

Prosthetics training program

Learn | understand | apply

«A very instructive course with a very sympathetic instructor...everything was explained very well!!!! Thank you.»

Robert › Neu Rachow

«Thoroughly in depth and well structured, this course covers all denture topics to help create integral prosthetics.»

Jade › USA

«This course is just what I needed to take my complete dentures to the next level.»

Emily › USA

«As a recent graduate, I felt that I needed more information on how to work on denture patients. This course was more than I expected and I feel more prepared.»

Polina › USA

Oliver Benz
Head of Education

Dear learners,

continuous progress in treatment methods and advancing digitization make lifelong learning an issue for dental technicians and dentists more than ever before. Different levels of know-how among laboratory staff pose additional challenges for dental laboratories.

This is where our SSOP portfolio fills an important gap in the continuing education offering when it comes to fundamental, comprehensive knowledge transfer on the subject of «Removable Dentures». Further training opens up interesting options for you and your own specialization or positioning in the dental market.

You may have already read that we successfully completed ISO 21001:2018 QM certification for educational institutions last year. This means we are subject to a continuous improvement process to provide you with the best learning environment.

I would be delighted if you too – like many other SSOP graduates – discover your enthusiasm for full denture prosthetics and gain valuable knowledge and confidence in practice in one of our training courses.

Your Oliver

Expectations

What the SSOP can do for you

We are more than standard product or application training, as you know. Our program offers you comprehensive knowledge on removable dentures and makes you an expert. Step by step – both in theory and in practice with modules that build on each other.

- › We pick you up exactly where your previous knowledge lies, from beginners to experts
- › You will gain routine, confidence and thus mastery for the realization of high-quality and sophisticated prosthetic restorations
- › **Discover yourself what the SSOP can do for you. Because tomorrows patients need your expertise.**

SSOP IS NOT JUST «ANY» TRAINING PROGRAM

Experienced experts from academia and practice, from dentistry and dental technology, share their extensive knowledge with you. Certified, sophisticated and with high learning success.

SSOP WITH A COMPREHENSIVE COURSE PROGRAM

All modules build on each other. They offer a complete range across the process for the fabrication of dentures. Be it for setup, registration or completion. With us you will find prosthetic knowledge and much more.

Individual

Let the SSOP advise you

Dental laboratories face numerous challenges with regard to their employee base. At the same time, cost and deadline pressure demand greater productivity and consistently excellent quality. Here we can offer you active support with our consulting services. This involves our experts analyzing processes and, in particular, employee know-how.

CONSULTING TURNS INTO EMPLOYEE LOYALTY

The 3 steps of SSOP Consulting:

1 Target definition

- › Potential problem areas are analyzed and targets for optimization are defined.

2 Analysis and concept

- › Analysis of workflows in the laboratory/practice or department
- › Analysis of employees' strengths and weaknesses

3 Solution approaches & training concept

- › Best practice proposals for increasing efficiency and productivity
- › Recommendations for a suitable training program for the prosthetics department

Your benefits

- › Optimization of processes for higher productivity
- › Employee development for lower staff fluctuation
- › Assuring consistent and improved quality in the prosthetics department

Our training offer

BEGINNERS (1-3 years)

ADVANCED LEVEL (3-5 years)

EXPERTS (>5 years)

SETUP TECHNIQUES

- › Hands-on / EC2
SETUP ACCORDING TO THE GERBER CONCEPT
- › Hands-on / EC3
SETUP ACCORDING TO THE PHYSIOLOGICAL CONCEPT

- › Hands-on / BC3
SETUP – FULL DENTURES IN PHYSIOLOGICAL OCCLUSION
- › Hands-on / BC4
SETUP – LINGUALIZED FULL DENTURES ACCORDING TO THE GERBER CONCEPT

- › Hands-on / AC2

THE MATERIAL DENTURES ARE MADE FROM
- › Hands-on / AC1
INVISIBLE DENTURES*

ANALOG WORKFLOW

- › Hands-on / LC1
COMPLETE PROSTHETICS FROM A TO Z WITH PATIENT* (LIVE)

CATEGORIES

- EC = ENTRY COURSE
- BC = BASIC COURSE
- AC = ADVANCED COURSE
- LC = LIVE COURSE
- WS = WORKSHOP

*This offer will be available in 2024.

In-house

The SSOP comes to you

True to the motto «Bring the SSOP into your laboratory or practice», our training program can also be booked as an in-house training. Our SSOP Teachers will come to you and can thus contribute anatomical and prosthetic knowledge as well as technical know-how directly to existing laboratory or practice processes.

YOUR BENEFITS

- › You can support your employees with targeted training to make their daily work even more efficient. This leads to satisfaction, not only in the team.
- › Existing materials and aids can be incorporated directly into the in-house trainings. This also allows laboratory/practice processes to be optimized at the same time.
- › In-house trainings involve less stress and time for the participants and are an effective cost-benefit option.

Unique

How the SSOP will surprise you

By passing on prosthetic expertise and practical know-how, we ensure that dental professionals – during and after training – can expand and refine their knowledge and skills. As an independent educational initiative of CANDULOR, we offer more than standard product training.

MODULAR

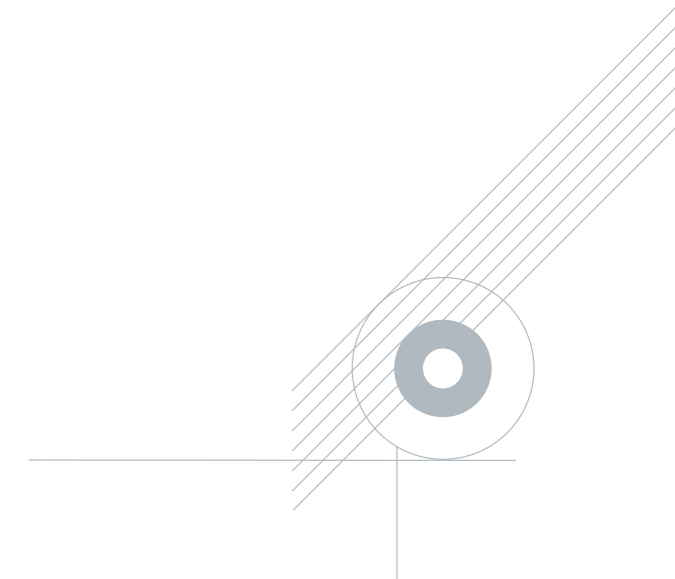

- › Introduction for everyone on the basis of prior knowledge: from beginners to experts
- › Full coverage: from theoretical courses to hands-on training up to complete programs or individual consulting
- › Modular course program with modules that interlock and build on each other

PRACTICE-ORIENTED

- › Well-founded theoretical knowledge
- › Step-by-step instructions
- › Numerous graphics to illustrate the solution approach

CERTIFIED

- › Continuous improvement process to stay best in class
- › Ensuring quality standards in terms of knowledge transfer, learning environment and individual support according to ISO 21001:2018
- › In-house teacher certification

Learning

How to expand your knowledge with the SSOP

With our comprehensive training program, we open up new perspectives for your training strategy for full denture prosthetics. Different levels allow you to get started based on your current level of expertise. The modular design allows you to become a true prosthetics expert. The itinerary and time can be arranged very flexibly. You decide when you want to reach your goals.

1 BOOKING

Choose your course and book directly via our website. If you need help choosing the right training, we will be happy to advise you.

2 PARTICIPATION

Our experts not only stand for excellent expertise and outstanding skills, but also for a stimulating learning atmosphere. In addition, you will receive a comprehensive workbook that is exclusively available from the SSOP: for learning and for later follow-up.

3 ONLINE TEST

Sustainability is important for your success. For this reason, the contents are queried again after the course with an online test. You determine the time and can prepare yourself optimally with the Workbook.

4 CERTIFICATE

After passing the online test, you will receive the course certificate directly to your home or practice/laboratory.

You are important to us

Contact us with your enquiry, whether it is about our training courses or for an in-house quotation.
